I. Using Landingi platform

1. Re-zip downloaded file. It consists of three folders.
2. In the Product folder you will find all templates – for this case you will need the one in a .landingpage format.
3. Log in to your Landingi account <https://www.landingi.com/> or create one with a 60-day free trial [HERE](#).
4. After login to the Landingi dashboard, press 'Create a new landing page' button located in the upper right corner.
5. In a pop up window choose the second option by clicking 'Upload a .landingpage file'.
6. Find your unpacked files and choose the one in a .landingpage format. You can choose one of two templates, depending on your goal:
 - promoting the webinar
 - webinar stream
7. When the template is imported, press 'Edit'. You will be redirected to Landingi editor.
8. Now you can edit any element on your landing page, both on desktop view and mobile view. Remember about adjusting the Thank You Page as well.
9. Click 'Publish' and it's ready! Don't forget about changing the URL to your domain in the dashboard.
10. To create a pop up, in Landingi dashboard choose a 'Popups' tab located in a left sidebar. Then, press 'Create new pop up'

button and choose 'Upload .popup file'. Then, repeat the same steps as when importing a landing page file.

11. Newsletter templates are prepared to work in different mailing systems. Adjust them, import .psd, .jpg and you are ready to go!
